

Wine vs Potato producer prices, 1830-1915 (HSSO H.2a)

Substitution-incentive ratio (right axis, dashed): wine cost / potato cost

Pre-phyloxera baseline (ratio 0.86)      1863 FR detect      1874 CH detect      Phylloxera era: 1863-1892      Peak ratio 2.30 (1892)      1908 ban (ratio 1.50)      1910 wine surge (107)

> is consistent with the historical-political-economy argument that mobilization lags structural pressure and requires coalitional opportunity (cf. Prestwich 1979). Source
